2. 3. The word "house" or "residence" as used herein with reference to building lines shall include galleries, porches, porte cocheres, projections and every other permanent part of the improvements, except roofs. Steps, terraces and planters outside of building lines will be permitted; however, provided that these elements may not extend higher than one foot (1') above finished grade lines at the house. No building shall be erected, placed or altered on any lot until the construction plans and specifications and a site plan showing the location of the structure have been approved by the Developer or its designated Architectural Review Committee (ARC) as to quality of workmanship and materials, harmony of external design with existing structures, and as to location with respect to topography and finish grade elevation. No plans will be approved without a contractor, licensed by the State of Mississippi, accepting responsibility in writing for the supervision of construction. The review and approval or disapproval of the ARC shall be final.

The living heated and cooled area of the main house or residential structure constructed as a one-story residence on any homesite, exclusive of porches, garages, and storage areas shall not be less than 1,700 square feet. Those easements on either side of the property line between lots 43 and 44 shall be seven feet in width.
